August 25, 2009

Dear Parents and/or Guardians,

It has come to our attention that a student at OCSI has contracted the swine flu. In accordance with school policy and in compliance with Okinawan prefectural guidelines, the following measures are being taken and are advised:

- all students who show symptoms of a fever are asked to stay at home
- students may not return to school for the duration of the fever and for a full forty - eight hours after the fever subsides.
- should you have any indication that your child may have a fever, please do not hesitate to consult a local doctor and receive a firm diagnosis.
- parents are also asked to report any cases of swine flu to the school office as quickly as possible
- students who have been diagnosed with the swine flu will not be allowed to return to school without a note from a doctor indicating that they have recovered
- students are required to wash hands regularly at school and are advised to gargle every evening after arriving home
- any student who appears to be showing symptoms of a fever and/or are generally feeling poor will be referred to the health office
- should a child present a fever during school hours parents are asked to come immediately for pick up and quickly take them to a local doctor for a firm diagnosis

OCSI will continue to monitor student health and be in communication with local health care authorities. We expect that with parent cooperation and careful adherence to the above measures students will be able to safely attend regular classes.

Sincerely

Randal J. Hadley
Superintendent, OCSI
